**Q : 1) The maximum value of centrifugal ratio on roads and railway respectively are taken as**

**A :  $\frac{1}{4}$  and  $\frac{1}{6}$**

**B :  $\frac{1}{6}$  and  $\frac{1}{8}$**

**C :  $\frac{1}{4}$  and  $\frac{1}{8}$**

**D :  $\frac{1}{8}$  and  $\frac{1}{4}$**

**Q : 2) The railway station at which a track line meets a main line is called**

**A : Way side station**

**B : Junction station**

**C : Termina station**

**D : Flag station**

**Q : 3) Narrow gauge is adopted where?**

**A : Terrain is hilly**

**B : Number of river crossing are more**

**C : Expected revenue earning is low**

**D : Acquisition of land is difficult**

**Q : 4) Which of the following is not a major cause of creep in rails?**

**A : Stopping of train**

**B : Traffic intensity**

**C : Acceleration or deceleration of train**

**D : Excessive rains**

**Q : 5) The maximum axle load for metre gauge in India, in tonnes, is**

**A : 13.26**

**B : 17.34**

**C : 22.82**

**D : 28.56**

**Q : 6) The device that is used to transfer the wagons, passenger coaches or locomotives (one at a time) from parallel tracks, without, any shunting is called:-**

**A : Turn table**

**B : Traverser**

**C : Triangles**

**D : Weight-bridges**

**Q : 7) Which of the following statement is wrong?**

**A : Coning of wheel is necessary to prevent rubbing of flange of wheel with rails**

**B : Coning is provided at 1 in 20 slope**

**C : In coning wheels are given an outward slope**

**D : Coning of wheels is required only in curves**

**Q : 8) Gauge of a railway track is the measure of**

**A : Distance between centre to centre of rails**

**B : Distance between inner faces of rails**

**C : Distance between outer faces of rails**

**D : Distance between the webs of two rails**

**Q : 9) Name the organization which is the research and development wing of Indian railways.**

**A : CRIS**

**B : RDSO**

**C : RSDO**

**D : IRCTC**

**Q : 10) Which of the following contract types is usually followed by railway department for construction purposes?**

**A : Item rate**

**B : Percentage rate**

**C : Piece rate**

**D : Lump-sum**

**Q : 11) The standard gauge width for broad gauge is:**

**A : 1.2 m**

**B : 1.767 m**

**C : 1.752 m**

**D : 1.676 m**

**E : 1.525 m**

**Q : 12) Grade compensation on B.G. tracks suggested in Indian railway is:**

**A : 0.02%**

**B : 0.03%**

**C : 0.05%**

**D : 0.04%**

**Q : 13) Which one of the following types of steel is used in the manufacturing of metro and mono rails?**

**A : Mild steel**

**B : Cast steel**

**C : Manganese steel**

**D : Bessemer steel**

**Q : 14) Consider the following statements concerning railways:**

- 1. A level stretch equal to the maximum train length is to be provided between the gradient reaches where a rising gradient is followed by a falling gradient.**
- 2. Vertical curves in railway tracks are not set out as parabolas.**
- 3. Diamond crossings can be laid on curves also.**
- 4. Curves should be avoided at the top level segment of bridges.**

**Which of the above statements are correct?**

**A : 1 and 2 only**

**B : 2 and 3 only**

**C : 1 and 4 only**

**D : 2 and 4 only**

**Q : 15) Consider the following statements concerning railways:**

- 1. A level stretch equal to the maximum train length is to be provided between the gradient reaches where a rising gradient is followed by a falling gradient.**
- 2. Vertical curves in railway tracks are not set out as parabolas.**
- 3. Diamond crossings can be laid on curves also.**
- 4. Curves should be avoided at the top level segment of bridges.**

**Which of the above statements are correct?**

**A : 1 and 3 only**

**B : 2 and 3 only**

**C : 1 and 4 only**

**D : 2 and 4 only**

**Q : 16) To prevent creep in rails, the steel sleepers are fixed with rails by**

**A : One anchor key**

**B : Two anchor keys**

**C : Three anchor keys**

**D : Four anchor keys**

**Q : 17) Which of the following is not a major cause of buckling of rail tracks:**

**A : Missing fastenings**

**B : Installation beyond specified rail temperature range**

**C : Water logging of rails**

**D : Excessive creep, jammed joints and sunken in welded tracks**

**E : No frequent lubrication to SEJ<sub>s</sub>**

**Q : 18) Which of the following is not the function of fastener?**

**A : To hold rails in proper positions**

**B : To join rail with sleepers**

**C : To join adjacent rails**

**D : To join sleeper with ballast**

**Q : 19) Maximum allowable grades are lower for railways than for highways. The reason is:**

**A : Steel wheel on steel rails have greater frictional co-efficient than rubber tyres on pavements.**

**B : Steel wheel on steel rails have lower frictional co-efficient than rubber tyres on pavements.**

**C : High grade causes discomfort to passengers**

**D : Trains are longer than vehicles on highways.**

**Q : 20) The section of rail is decided on the basis of:**

**A : Spacing of sleepers**

**B : Type of rails**

**C : Gauge of track**

**D : Speed of train**

**Q : 21) Which of these is Not a function of check rail?**

**A : Protection from derailment**

**B : Protection for interlocking system of railway track**

**C : Protection for flange from excessive wear**

**D : Protection from excessive wear of rail**

**Q : 22) The main function of a fish plate is:**

**A : To allow rail to expand and contract freely**

**B : To join the two rails together**

**C : To join rails with the sleeper**

**D : None of the above**

**Q : 23) Maximum value of 'throw of switch' for broad gauge track is:**

**A : 89 mm**

**B : 95 mm**

**C : 100 mm**

**D : 115 mm**

# RAILWAY ENGINEERING

For Any Query Call – 8595517959 | Website – [everexam.org](http://everexam.org)

Daily Class – 8:00 PM

**Q : 24) Sand may be used as ballast for**

**A : Wooden sleeper**

**B : Steel sleeper**

**C : Cast-iron sleeper**

**D : None of these**

**Q : 25) The bottom width of foot in a flat footed rail is**

**A : 66.7 mm**

**B : 70.1 mm**

**C : 121.6 mm**

**D : 136.0 mm**

**Q : 26) Sleeper density, normally, adopted in Indian railway practice is**

**A :  $M + 1$  to  $M + 7$**

**B :  $M + 1$**

**C :  $M$**

**D :  $M - 2$**

**Q : 27) The ballast packed below and around sleeper to transfer the load from sleeper to sub-base, generally, consists of**

**A : Broken stones**

**B : Gravel**

**C : Moorum**

**D : All of these**

**Q : 28) At a rail joint, ends of adjoining rails are connected with a pair of fish plates and**

**A : 2 fish bolts**

**B : 4 fish bolts**

**C : 6 fish bolts**

**D : 8 fish bolts**

**Q : 29) At a rial joint, ends of adjoining rails are connected with a pair of fish plates and**

**A : 2 fish bolts**

**B : 4 fish bolts**

**C : 6 fish bolts**

**D : 8 fish bolts**

**Q : 30) The depth of ballast D, is calculated from the following formula:**

$$\mathbf{A : D = \frac{S - B}{2}}$$

$$\mathbf{B : D = \frac{S - B}{10}}$$

$$\mathbf{C : D = \frac{S - B}{15}}$$

$$\mathbf{D : D = \frac{S - B}{20}}$$

**Q : 31) The standard length of sleeper for B.G. railway track, in cm, is**

**A : 150**

**B : 180**

**C : 250**

**D : 310**

**Q : 32) 52 kg rails are mostly used in:-**

**A : Broad gauge**

**B : Metre gauge**

**C : Narrow gauge**

**D : Both (a) and (b)**

**Q : 33) Ballast is used in railway section to serve as:**

**A : An elastic bed**

**B : Foundation of rail track**

**C : Both (a) and (b)**

**D : Protection from animals**

**Q : 34) For a sleeper density of  $(n + 5)$ , the number of sleepers required for constructing a broad gauge railway track of length 650 m is:**

**A : 975**

**B : 918**

**C : 900**

**D : 880**

**Q : 35) Following tests are conducted for rails**

- 1. Falling weight test**
- 2. Tensile test**
- 3. Hammer test**

**The compulsory tests are**

**A : Only 1**

**B : 1 and 3**

**C : 1 and 2**

**D : 2 and 3**

**Q : 36) Distance between inner faces of the flanges is kept:**

**A : Equal to gauge distance**

**B : Slightly less than gauge distance**

**C : Double amount of gauge distance**

**D : Slightly more than gauge distance**

**Q : 37) Composite sleeper index is employed to determine:**

**A : Sleeper density requirement**

**B : Number of fixtures requirement for a particular type of sleeper**

**C : Durability of sleeper**

**D : Mechanical strength of wooden sleepers and thereby gives its suitability to be used as sleepers.**

**Q : 38) The Indian railway has been divided into-**

**A : Six zones**

**B : Right zones**

**C : Twelve zones**

**D : Sixteen zones**

**Q : 39) Bull headed rails are generally provided on:**

**A : Points and crossing**

**B : Straight tangents**

**C : Curved tracks**

**D : Meter gauge tracks**

**Q : 40) Sleeper density is**

**A : Number of sleepers for two tracks**

**B : Number of sleepers per rail length**

**C : A sleeper on either side of a rail joint**

**D : Minimum distance between two neighboring sleepers**

**Q : 41) the standard length of rail for board gauge and metre gauge are respectively:**

**A : 12 m and 12 m**

**B : 12 m and 13 m**

**C : 13 m and 12 m**

**D : None of the above**

**Q : 42) For a curved railway track with gauge  $G$  in metre, radius  $R$  in metre and speed  $V$  in m/sec. Super-elevation in metre is given by**

**A :  $GV^2/R$**

**B :  $GV^2/27R$**

**C :  $1.67/GV^2/R$**

**D :  $GV^2/127R$**

**Q : 43) The rail section is designated by its**

**A : Total length**

**B : Total weight**

**C : Cross-section area**

**D : Weight per meter length**

**Q : 44) Which one of the following statement is correct regarding ballast used for railway tracks?**

**A : The minimum depth of ballast for B.G. section is 20 cm – 25 cm**

**B : The quantity of stone ballast required for one metre length of track is  $0.53 \text{ m}^3$  for B.G. section**

**C : For M.G. section the width of ballast is 1.83 m**

**D : The minimum depth of ballast for N.G. section is 10 cm**

**Q : 45) For broad gauge track standard weight of rail per m is:**

**A : 35 kg**

**B : 45 kg**

**C : 55 kg**

**D : 65 kg**

**Q : 46) Which of the following types of sleepers is preferred?**

**A : CST-9 sleeper**

**B : Steel trough sleeper**

**C : Wooden sleeper**

**D : Concrete sleeper**

**Q : 47) Which of the following types of sleepers is preferred?**

**A : CST-9 sleeper**

**B : Steel through sleeper**

**C : Wooden sleeper**

**D : Concrete sleepers**

**Q : 48) The minimum value of composite sleeper Index (CST) prescribed on Indian railways for track sleeper is**

**A : 783**

**B : 1252**

**C : 1455**

**D : 873**

**Q : 49) Two important constituents in the composition of steel used for rail are**

**A : Carbon and silicon**

**B : Manganese and phosphorous**

**C : Carbon and manganese**

**D : Carbon and sulphur**

**Q : 50) The main function of fish plates in rail joints is to:**

**A : Join two rails together**

**B : Provide for any expansion or contraction**

**C : Transfer the load to the ballast**

**D : Join rails with sleeper**
