

Q : 1) The manhole in which a vertical pipe is used is called

A : Deep manhole

B : Drop manhole

C : Ramp

D : Lamp hole

vertical pipe

Fig. 7.3. Lamp-hole.

Q : 2) Which one of the following test is conducted to evaluate the durability property of aggregate?

A : Water absorption test

B : Impact test

~~C : Soundness test~~

D : Abrasion test

Resistance to Weathering

Soundness test

(C)

Sudden loading

IS: 2386

✓ disintegration

[freezing & thawing] Resistance

Magnesium sulphate & Sodium (16-18 hrs)
oven dry (105° - 110°C)

Q : 3) For which one of the following purpose, moving car observer method is adopted?

- ~~A~~ : To determine traffic flow
- B : To determine traffic capacity
- C : For origin & destination studies
- D : None of the above

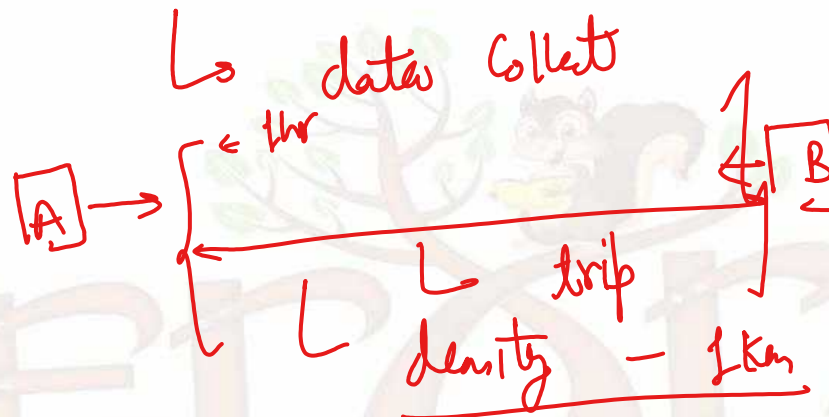

(A)

$\frac{\text{veh}}{\text{hr}}$

⇒ Traffic flow

Moving car method ⇒ speed

Q : 5) Silt control devices which extract the silt from the canal-water the silted water has travelled a certain distance in the off-take ^{of canal.} is called

A : Silt excluders

B : Silt ejectors

C : Silt extractors

☒ D : Both silt ejectors and extractors

silt controls Canal-water (silt) water

silt excluder water → fresh.
silt

Fig: Plan of Silt Ejector

offtake

Q : 6) Which one of the following substance is blended with bitumen for production of flow curing cutback bitumen?

A : Petrol

B : Diesel

C : High boiling point gases

D : None the the above

Bitumen
viscosity ↓ volatile substance
Slow curing → Blending Bitumen with oily petroleum fraction (370°C)
Medium curing → Hydrocarbon (Kerosene)
Rapid curing → gasoline, naphtha

Q : 11) The shear stress required to produce unit rate of shear strain is

A : Turbulence

B : Specific gravity

C : Density

~~D : Viscosity~~

$$G_{ws} = \frac{\tau}{\dot{\gamma}}$$

$$f \sim \frac{m}{s}$$

$$\tau \propto \frac{d\phi}{dt}$$
$$\tau = \frac{d\phi}{dt}$$
$$\textcircled{D.}$$

Q : 12) If there is a pressure of black cotton soil upto 3m depth followed by medium dense sand, then which one of the following type of foundation will be suitable?

A : Spread footing

~~B : Under reamed piles~~

C : Raft foundation

D : Deep foundation

B

Figure 20.30 Bored cast in-situ under-reamed piles (longitudinal section): (a) Single under-ream pile and (b) multi under-ream pile. $\phi_1 = 45^\circ$ (approximate) $\phi_2 = 30^\circ$ to 45° ; all dimensions are in mm.

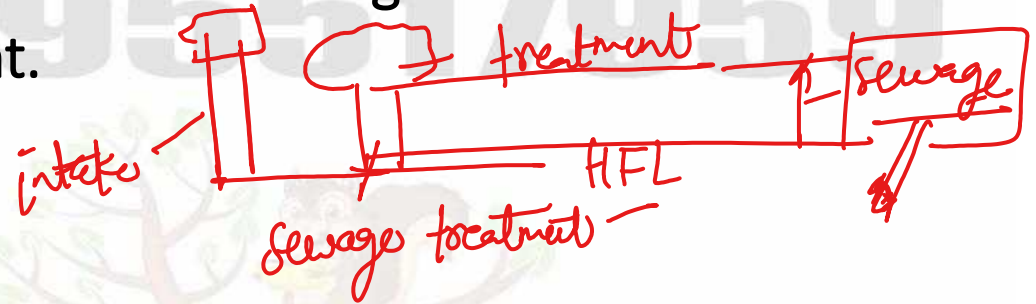

Q : 13) The intake site should

A : Remain inaccessible during floods

B : Not get flooded

C : Both remain inaccessible during floods and not get flooded

D : Be far away from treatment plant.

Q : 17) Which one of the following earth pressure acts behind a bridge abutment?

- A : Active earth pressure
- B : Passive earth pressure
- ☒ C : Earth pressure at rest
- D : None of the above

Bridge =
Concr = M-30
 24.15 N/mm^2
Span C/C
Bearing = 10.4m

Q : 18) As per IRC recommendation, what should be the value of camber for concrete/bituminous surface in case of light rainfall?

A : 2Percentage

B : 1.7Percentage

C : 3Percentage

D : 2.5Percentage

B

IRC recommendation		light rainfall	Heavy rainfall.
Concrete	1.7%		2%
thick Bituminous			
thin Bituminous	2%		2.5%
WBM (gravel pavement)	2.5%		3%
Earthen road	3%		4%

Q : 19) Consider the following statements regarding zero air void line:

X: In case of pure sandy soils, the effect of water content on the dry density is well defined when the water content is below the optimum value.

Y: The line of optimum is roughly perpendicular to zero air void line. Which of the above statement/is/are CORRECT?

A : X only

B : Y only

~~C : Neither X nor Y~~

D : Neither X or Y

Q : 20) As per Buston's formula for a city of population of 100000, fire demand will be

A : 31820 litre/minute undefined

B : 11360 litre/minute undefined

C : 46370 litre/minute undefined

~~D : 56630 litre/minute undefined~~

Buston formula

$$Q = 5663 \sqrt{P}$$

population
thousands

(D)

litre/minute

$$5663 \sqrt{100}$$

$$= 56630$$

Free man formula =

$$Q = 1136 \left(\frac{P}{8} + 10 \right)$$

National Board

$$Q = 4637 \sqrt{P} (1 - 0.01 \sqrt{P})$$

Kuichling formula =

$$Q = 3182 \sqrt{P}$$
